- ▲ Wireless locators
- ▲ NextCall call-forwarding
- ▲ Wireless scrolling display
- ▲ Wireless repeaters

The Arial wireless communication system enables residents in assisted living, skilled nursing or independent living to call staff with the press of a button or pull of a cord. The Arial system offers residents mobility and independence with the security of knowing they are able to notify staff when necessary. The system is also equipped with a check-in feature, providing residents with a convenient way to touch base with staff on a daily basis.

The Arial system utilizes state-of-the-art 900 MHz wireless technology. It easily integrates with smoke alarms, the WanderGuard® departure alert system and TABS® mobility monitors. With Arial, you are able to economically add to the system as your facility grows. Expanding your system doesn't require miles of hardwiring or expensive remodeling. The Arial wireless communication system is ideal for nearly any facility, whether a high-rise, single-story or multi-acre campus arrangement.
