

SOLUTION OVERVIEW

# AeroScout<sup>®</sup> Asset Management

Reduce costs and transform management of mobile assets

## Solution Benefits

- **Cost savings.** Raise asset efficiency, helping reduce purchases and optimize your rental program. Use shrinkage control to achieve annual savings in the tens or hundreds of thousands.
- **Caregiver efficiency.** Eliminate the stress of hunting for a needed device—and the hoarding that often results. Slash search times to as little as 2 minutes.
- **Improved patient care.** Ensure critical equipment is available and maintained. Virtually eliminate shortages and retrieve assets on recall within hours
- **Optimized asset utilization.** With total visibility to where and how each asset is used, you can optimize asset workflow and achieve real-time PAR level visibility and more efficient asset management.
- **Endless possibilities and coverage.** One platform that supports a variety of technologies: active RTLS, RAIN RFID, Low Frequency for chokepoint, Ultrasound for room-level accuracy
- **Complete end-to-end solution.** Supports multiple applications for scalability, interoperability and more.

## Challenges

Hundreds of hours spent searching for equipment. High-value assets lost, stolen or misplaced. Poor utilization. Unnecessary rentals and purchases. Delays in patient care as caregivers wait for what they need.

## Solution

Automate asset management so it's easy for caregivers and other staff to see the location and status of assets in real time. Capture and analyze data about how assets are being used—and apply those insights to make better in-the-moment decisions and long-term improvements. Integrate with CMMS, Infusion Management solutions and communication devices to extend visibility and deepen understanding of equipment distribution, utilization and allocation.

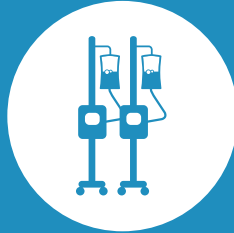

## How It Works

For higher-value equipment, tag each asset you want to monitor. Those tags communicate wirelessly with the MobileView enterprise visibility and analytics platform. For other assets, use a RAIN RFID tag that will trigger alerts through MobileView<sup>®</sup> when those assets go into trash or laundry chutes or are at risk of theft.

*“The AeroScout solutions are so important and easy to use that we made sure everyone at PRMC, including our CEO, has access to the applications.”*

## The Value of Advanced Asset Management

EQUIPMENT  
LOCATING

**REDUCTION**  
in search time

SHRINKAGE  
CONTROL

**SAVED** by avoiding  
equipment loss and  
replacement costs

PREVENTIVE  
MAINTENANCE

**COMPLETION** of monthly  
pump maintenance in  
less than a week

RECALL  
MANAGEMENT

**DEVICE REMEDIATION**  
within 5 days for 800  
infusion pump fleet

INVENTORY  
VISIBILITY

**INITIALLY SAVED**  
avoiding purchase of  
more infusion pumps

PAR LEVEL  
MANAGEMENT

**REDUCTION** in delays  
in patient care due to  
available pumps

RENTAL  
MANAGEMENT

**SAVINGS PER YEAR**  
reducing unnecessary  
rental of specialty beds

ORDER  
FULFILLMENT

**MORE EFFICIENT**  
fulfillment of equipment  
and device needs

**SOURCE FOR EVERYTHING YOU NEED TO TRANSFORM ASSET MANAGEMENT:**  
HARDWARE, SOFTWARE WITH INTEROPERABILITY, ANALYTICS & MANAGED SERVICES.  
POWERFUL PLATFORM FOR MULTIPLE RTLS APPLICATIONS. **STANLEY HEALTHCARE.**
