

Data Sheet:

STANLEY Healthcare University Onsite Training

STANLEY Healthcare University Brings the Training to You—At Your Site, On Your Solution, Customized Just For You

Overview

STANLEY Healthcare University brings the instructor and training environment to you with onsite training. Our expert instructors deliver training at your facility to meet the learning needs of your organization. Available to Acute Care and Senior Living customers—train your application support team, system administrators and end users. Choose standard content, or we'll build custom content specific to your needs.

Our Educators

Our Technical Trainers are field-experienced with STANLEY Healthcare technologies. They have implemented our systems, and worked in Acute Care and Senior Living facilities, training IT and care staff to use our solutions.

Our Clinical Consultants are licensed nurses with a wide range of experience consulting and educating in women's health, patient safety and security, infant protection, and clinical workflow analysis.

Technical Training

Solid training of your IT and application administration staff is essential to maintaining the health of your mission critical technologies. Whether you are adding new solutions or new staff, our Technical Trainers will customize training to match your environment. Frequently requested agendas include:

- System and facility technical walk-through
- Analyze and test Events and Alerts
- Fine-tune configuration parameters
- Reports management
- User administration
- Tag/device management
- System maintenance and troubleshooting
- Battery management

Onsite Training

- Our Instructors and Clinical Consultants come to you
- Customized training for your IT, biomed, security, and clinical staff
- Training on your STANLEY Healthcare solutions in your facility

Please contact your STANLEY Healthcare representative or email SHUniversity@sbdinc.com to get started.

It is our aim to help educate you and your staff on STANLEY Healthcare solutions that maximize the quality, safety, and efficiency outcomes of your patient care.

Application and Solution Training

Realize the full benefit and improve adoption of your STANLEY Healthcare solution investment by training your staff. Usually a short training session is all that is needed for care staff to learn how to apply new technologies to their tasks. Two days of onsite training can empower over 100 users attending short training classes. From basic Search and Locate to complex Patient Elopement solutions, tasks performed by end users are relatively simple once they are trained. Customize your training by combining several topics into one engagement for different groups. Popular requested topics include:

- Temperature Monitoring and Reporting
- Asset Management: Par Level, Advanced Search, Inventory and more
- Staff Safety
- Patient Elopement, Wander Management
- Patient Flow
- Managing and Running Reports

Clinical Consulting and Education

Our Clinical Consulting team brings their clinical expertise to your clinical staff for specific education, training and consulting needs. Let our licensed clinicians walk-the-walk with your staff when you most need it.

Hugs® Infant Protection end user training for the entire L&D staff, including Manager Training and Configuration Workshop delivered at your site. Frequently delivered at system implementation go-live, we can also come again to train new staff, refresh your knowledge, or consult with you to fine-tune procedures and workflows. Pediatric Security Solution training also available.

Fall Management Education and Consulting: Our clinical consulting team will help you successfully implement your fall monitoring products within a comprehensive fall management program by providing education and planning tools on evidenced-based practices. Services include facility assessment, fall leader workshop, custom training and materials, patient and family information samples, onsite consulting with care staff, and follow-up check to see how you're doing.

About STANLEY Healthcare

STANLEY Healthcare provides over 5,000 acute care hospitals and 12,000 long-term care organizations with enterprise solutions that transform safety, security and operational efficiency. The STANLEY Healthcare solution set enables customers to achieve organizational excellence and superior care in five critical areas: Patient Safety, Security & Protection, Environmental Monitoring, Clinical Operations & Workflow and Supply Chain & Asset Management. These solutions are complemented by consulting, training, implementation and integration services. STANLEY Healthcare is proud to be part of Stanley Black & Decker, Inc.
