

SOLUTION OVERVIEW

WanderGuard[®] BLUE Wander Management

Helping caregivers protect residents

WanderGuard[®]
BLUE

Solution Benefits

- **Affordable, next-gen technology.** WanderGuard BLUE uses a new generation of technology, including Bluetooth[®] Low Energy (BLE), to not only deliver a wider range of functionality, but to reduce the cost of ownership, too.
- **Easy setup and management.** WanderGuard BLUE cuts setup time in half compared to other solutions. Everything is handled on the WanderGuard BLUE Manager tablet application, which allows you to quickly download door configuration templates and user lists to each Door Controller.
- **Secure and reliable operation.** Every user has an individual passcode to clear alarms and bypass exits, and user lists can be quickly updated with the app. WanderGuard BLUE offers highly reliable operation; it's designed to detect, avoid and overcome interference.
- **Achieve data-driven care.** WanderGuard BLUE offers sophisticated reporting, event management and audit capabilities to allow you to benchmark your performance and move towards care programs built on data.

Challenges

Safeguarding senior living residents at risk of wandering. Providing protection while preserving residents' dignity and mobility.

Solution

Protect memory care residents against elopement risk with the most sophisticated—and the simplest—wander management solution. WanderGuard BLUE offers built-in UL 294 access control and integrates seamlessly with the Arial[®] platform for advanced alerting and reporting. Whether you need to protect one door or an entire campus, it's an affordable and scalable solution that grows with you.

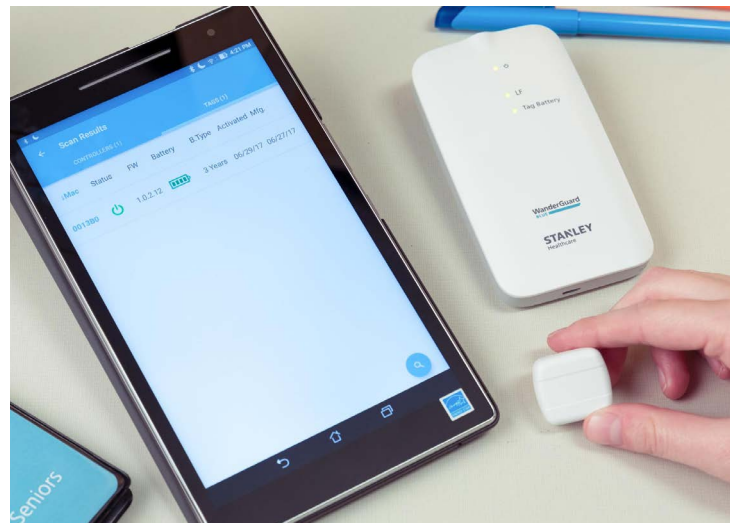

How It Works

WanderGuard BLUE combines small and discreet resident bracelets and door components with streamlined design and simplified management. When a resident with a bracelet approaches a monitored door, the system alerts and the door locks when paired with optional magnetic door locks.

“WanderGuard BLUE takes wander management to a whole new level. It’s an ideal solution for protecting senior living residents.”
