

DATA SHEET

SpaceTRAX® Reporting Options

Optimize your Clinical Inventory Management Processes, Reduce Operational Costs and Avoid Obsolesces using the SpaceTRAX Reporting Options.

SpaceTRAX®

Description

SpaceTRAX® is a web-based, clinically-focused inventory management system for healthcare facilities. The system is HIPPA-compliant and uses secure software technology. SpaceTRAX is used by hospitals and Integrated Delivery Networks (IDN) to track clinical inventory for a variety of procedural areas.

Standard Reporting Capabilities

SpaceTRAX offers a comprehensive range of out-of-the-box reports for inventory managers and department administrators, such as inventory usage and valuations, items and procedures, and inventory issues.

All reports can be customized, by using filters, according to time periods, reported items, participating units, departments, and more. Additionally reports can be printed, and/or exported to Excel spreadsheets for further investigation.

The following table lists and explains all the available reports in SpaceTRAX:

Inventory Usage Reports	
Purchase Orders	Lists all purchase orders opened over a specified time period.
Past Due Items	Lists all items from purchase orders that have not arrived within the specified lead time.
End of Day Usage	Shows all items used in a specified day, along with the associated patient (if applicable).
Inventory Usage	Shows Top and Bottom use items, within the inventory, over a specified time period.
Inventory Usage	Lists all items used, including quantity used, over a specified time period.
Zero Use Items	Lists items in the inventory that have NO use, within a specified time period.
Cycle Counts	Shows the Lot and Expiration dates of a specified inventory section. Used for checking SpaceTRAX quantity on-hand with stock-take.
Adjustment Transactions	Lists all transactions of a given type that have occurred within the organization, over a specified period of time (highly customizable).

Procedure Reports	
Procedure by Physician	Shows all procedures completed by a specific physician.
Average Case Cost	Shows the average cost and charges associated with a given procedure, in a given organization.
Case List	Allows you to report on cases based upon any staff, patient or procedural information.
Cases	Allows you to report on any case that was created in SpaceTRAX.
Issue Reports	
Expired Items	Shows items expiring within different date ranges.
Missing Data	Shows items, within departments, that are missing par levels and cost.
Auto-Adjust	Shows all items used within the department, where Lot or Expiration information was not found in the current inventory, over a specified time period.
Inventory Valuation Reports	
Current Inventory	Shows all items within the department (can be customized based upon Pricing and Classification).
Inventory Month Ending Value	A bar graph showing the total department inventory value by month, over a specified time period.
Current Inventory Value	Shows all items and includes pricing, if entered.
Receive vs. Use	A bar graph showing both quantity of items received into inventory as well as items used from inventory, over a specified time period.
Item Reports	
Market Share	A pie chart showing the amount and value of inventory by Manufacturer.
Price Inconsistency	Displays inventory discrepancies where ship case quantity does not match individual item quantity (i.e. BOX/5, CASE 24).
Par Level	Shows items grouped above, below, or in-between entered par values.
Replacement Items	Shows items within the department that have been replaced by another item within the department (shows the replaced item and the replacement item on the same line).
Obsolete Inventory	Shows items within a department that are marked as Obsolete.

Custom Reports

In addition to the standard reports, custom reports can be designed per customer-specific requirements and may allow additional capabilities, such as:

- Multiple exporting formats: PDF, Image, HTML, etc.
- Scheduling and publishing via email.

Custom reports are seamlessly integrated into the SpaceTRAX user interface. Administrators can control user access to custom reports and exposure to sensitive data, such as ePHI & pricing, using the core permission management tools.
