

COVID-19 QUICK DEPLOYMENT BUNDLE

Arial® Wi-Fi for Pop-Up Hospitals and Temporary Care Areas

Challenges

Due to the recent COVID-19 pandemic, government agencies and hospital systems are establishing temporary care facilities to house the overflow of patients. These temporary field hospitals are being setup in places not designed as acute care facilities. The rapid establishment and the temporary nature of these facilities do not allow for professionally installed or wired infrastructure to support traditional hospital nurse call systems.

In addition, many hospitals are having to set up patient beds in non-traditional areas within existing hospitals, like hallways, to extend patient care areas to deal with the influx of sick patients. These facilities also need a solution for patients in the temporary care areas to call for assistance.

Solution

STANLEY Healthcare's Arial Wi-Fi Emergency Call System is a centralized event management, notification, reporting and analytics platform to ensure patient safety and security. In order to meet the needs of the crisis, the Arial Wi-Fi system is packaged and pre-programmed to be quickly self-installed by the customer and enable full wireless emergency call functionality for temporary hospital and patient care areas that have sufficient Wi-Fi infrastructure to support the system. Packages include:

Arial Wi-Fi Core System

Computer, Software and Arial Mobile App License, AeroScout® Location Engine (ALE), Hardware Manager, TED and accessories

Arial Wi-Fi Pendant Kit

20 pendants with belt clips and accessories

Arial Wi-Fi Call Station Kit

20 Wireless Call Stations and push button cords

COVID-19 RESPONSE LIMITED-TIME OFFER*

To support the need to set up temporary hospitals and patient care areas due to the COVID-19 pandemic, we have developed a special limited-time package that enables facilities to quickly self-deploy the Arial Wi-Fi Emergency Call System. This bundle includes components to supports 20 Wi-Fi Pendants or 20 Wi-Fi Call Stations. Additional pendants and call stations bundles can be added to scale the system to meet facilities' needs.

How It Works

The Arial Wi-Fi platform provides end-to-end capabilities to meet facilities' needs. Patients can call for nurse assistance at the bedside using either pendants or call stations. When help is needed, alarms are sent directly to caregivers via the Arial dashboard at the workstation and Arial Mobile App on staff members' phones (iOS or Android) with alarm information to help caregivers respond quickly. Caregivers can reset the alarm from the pendant or call station where it originated. The interactive Arial workstation shows at a glance a list of active alarms. Arial's reporting tool lets staff see specific events or a patient's call history. Reports show call volumes, response times and more.

Deployment

In order to meet the needs of this crisis, we have designed a simplified and remote implementation process that enables healthcare facilities to be fully operational on an accelerated schedule. The Arial Wi-Fi Emergency Call Solution is packaged and pre-programmed to arrive on site ready for a simple, quick self-installation and setup, supported remotely by STANLEY Healthcare's Professional Services team.

Conditions

- Arial Wi-Fi can be deployed with any WLAN environment that is supported by the AeroScout® Location Engine, including Cisco and Aruba.
- Pendants and Call Stations will be pre-configured with IBSS, CCX or WDS based on the type of infrastructure the facility uses.
- Batteries for call stations and pendants are provided.
- Additional Arial Wi-Fi Client software can be installed on existing customer PCs.
- Arial Mobile App is supported for both iOS and Android devices with a maximum of 50 concurrent users (devices not included). Facility must have Wi-Fi deployment with sufficient coverage. The Arial server must be connected to a LAN and devices using the Arial mobile app must be connected through the Wi-Fi network to the same LAN as the Arial server.
- Pre-configuration of the Arial Wi-Fi system and remote support to the customer during the setup process are included in the bundle.
- This offering is not UL listed for use in hospitals. Due to the temporary nature in a crisis scenario, buyer must confirm such standards and requirements are being waived.

*DISCLAIMER

All product and pricing offerings are subject to a mutually-agreed quote and acceptance by STANLEY Healthcare of customer's purchase order. STANLEY Healthcare reserves the right to set criteria for this promotion based on factors including, but not limited to, contractual terms and product availability. The offer period begins on April 1, 2020 and expires on June 30, 2020. Customer must submit a purchase order to STANLEY Healthcare no later than June 30, 2020. This offer may not be applied retroactively for orders placed prior to April 1, 2020. STANLEY Healthcare reserves the right to modify or cancel this offer at any time without notice. Offer valid for customers only in the United States, Canada and other selected geographies.
