How it Works

Depth sensors, motion sensors and bed sensors help to identify residents with changes that could be associated with **early symptoms** of COVID-19. Remote deployment is available.

Resident-specific predictive alerts for proactive care, including **Vital Signs** (pulse rate, respiratory rate); **Sleep Quality** (restlessness, time in bed); **Bed Occupancy**; **Activities of Daily Living** (living room/bathroom activity); and **Gait Mobility** (walking speed, stride time/length, TUG time).
