

COVID-19 QUICK DEPLOYMENT BUNDLE

SpaceTRAX® Inventory Management

Manage and protect critical inventory such as test kits and PPE

Challenges

The recent COVID-19 outbreak is inundating hospitals and healthcare facilities with an unprecedented number of patients that either need to be tested for the virus or treated for the disease. Consumable items used to diagnose and care for patients, such as testing kits, masks, gowns, gloves, and ventilator circuits to name a few, are in high demand and short supply. Now more than ever hospitals need an easy way to manage their vital supplies and protect them from misappropriation.

Solution

STANLEY Healthcare's SpaceTRAX® is a cloud-based solution that provides "point of use" data and visibility into on-hand inventory and usage patterns. Items are quickly scanned in and out of inventory using the manufacturers barcode label.

We also offer an RFID-enabled inventory management enclosure—together SpaceTRAX +RFID can help reduce shrinkage by securing valuable and limited items within a secure storage cabinet. Access to the cabinet is available only to credentialed staff and those with a personally administered proximity card. Information on who accessed the cabinet and the supplies that are removed are traced through the complete chain of custody. SpaceTRAX + RFID also improves speed and accuracy of inventory management and charge capture.

How It Works

SpaceTRAX uses manufacturers' barcodes to capture all key data: each item's part number, description, expiration date, as well as lot and serial numbers. With SpaceTRAX Plus RFID, you can tag high dollar/high priority items with passive UHF tags to track their location and usage with unprecedented speed and ease. The smart cabinet also offers flexible options—including wireless and cellular connectivity and various sizes.

COVID-19 RESPONSE LIMITED-TIME OFFER*

STANLEY Healthcare has developed time-limited bundles to enable hospitals to rapidly implement inventory management in clinical areas, with the option of adding Intelligent RFID Cabinets.

Deployment

We have designed a simplified and remote implementation process that enables hospitals and healthcare facilities to quickly take advantage of either SpaceTRAX or SpaceTRAX + RFID. The accelerated timeline enables you to be fully operational in 72 hours (96 hours if deploying RFID cabinets).

Conditions

- Full SpaceTRAX functionality is not available with this offer;
- To provide an accelerated delivery and remote onboarding cycle:
 - Product expiration dates are not configured unless there is a requirement
 - Limited reporting capabilities are available
 - Integration with existing systems is not offered

Why SpaceTRAX?

1. No capital costs.
2. Rapid deployment.
3. Increased ROI: Optimize inventory levels. Eliminate losses due to expired products. Eliminate guesstimating and oversupplying. Increase charge capture.
