

COVID-19 QUICK DEPLOYMENT BUNDLE

SpaceTRAX[®] Inventory Management for Senior Living

Manage and protect critical inventory
such as test kits and PPE

The SpaceTRAX cloud-based inventory management solution provides “point of use” data and visibility into on-hand inventory and usage patterns.

Combined with an RFID-enabled inventory management cabinet, SpaceTRAX + RFID helps reduce shrinkage by securing valuable items within a secure enclosure.

Rapid and remote deployment allows you to focus on what matters most during this time of crisis.

How It Works

- Items are quickly scanned in and out of inventory using the manufacturers’ barcode label. Capture all key data such as part number, description, expiration date, as well as lot and serial numbers. Tag high priority items with passive UHF tags to track their location and usage.
- Access to the enclosure is available only to credentialed staff and those with a personally administered proximity card. Information on who accessed the cabinet and the supplies that are removed are traced through the complete chain of custody.
- A simplified and remote implementation process enables an accelerated delivery timeline and remote onboarding cycle.

*DISCLAIMER

All product and pricing offerings are subject to a mutually-agreed quote and acceptance by STANLEY Healthcare of customer’s purchase order. STANLEY Healthcare reserves the right to set criteria for this promotion based on factors including, but not limited to, contractual terms and product availability. The offer period begins on April 1, 2020 and expires on June 30, 2020. Customer must submit a purchase order to STANLEY Healthcare no later than June 30, 2020. This offer may not be applied retroactively for orders placed prior to April 1, 2020. STANLEY Healthcare reserves the right to modify or cancel this offer at any time without notice. Offer valid for customers only in the United States, Canada and other selected geographies.
