

# Infant Protection Checklist

Not all infant protection systems are made the same. Use this checklist to get the information you need to make the right choice for your hospital.

Designed with caregivers in mind, the Hugs solution is easy, intuitive and helps you deliver a great patient experience—that's why it's the Community Standard in infant protection.

For more information, reach out to your local STANLEY Healthcare Client Executive or call **1-888-622-6992**.
