

SOLUTION OVERVIEW

Environmental Monitoring

Powered by MobileView®

Empowering clinics and outpatient centers to safeguard important assets and mitigate risks

Compliance Simplified for Clinics & Outpatient Centers

- **Meets monitoring requirements for CDC, VFC, COVID-19 Vaccines and FDA** for safeguarding your clinical environment in surgery centers, urgent care, dialysis centers, blood banks and clinics. Increase staff efficiency, reduce costs, and improve patient safety.

Additional Solution Benefits

- **Robust reports to meet regulatory compliance**, prevent product loss, and help improve staff efficiency and customer experience.
- **Automated, continuous monitoring.** Round the clock data recording, provides reliable real-time alerts whenever issues occur.
- **Ease of use and navigation.** Application is intuitive and provides easy to understand information allowing staff to focus on top priorities.

Scalable, Flexible and Reliable Solution Benefits

Our MobileView solution offers a turn-key deployment using the Wi-Fi structure hosted on premise.

- **Customizable views.** Filter views by device category, department, and more. Add or delete data elements according to your needs. Review graphical data and change the timeframe for the display in one click or in date-editable format
- **Alert prioritization.** Prioritizes alerts for out of range assets, or approaching an excursion, to the top of the display in a one view.
- **Centralized view capability.** View in Kiosk mode to place the display on a large screen in a central location and view data in real-time.
- **View across multiple devices.** Ability to view data on a desktop, along with mobile devices.
- **All-in-one solution.** Provides visibility to temperature, humidity, door (open/close) status, voltage and more. Easily scalable to monitor multiple sites and facilities utilizing customer's wireless infrastructure.
- **Unparalleled breadth and depth of solutions.** Supports multiple real-time applications including Asset Management, Patient Flow, Staff Protection, Hand Hygiene Compliance Monitoring and more.

Audit Ready, End-to-End Solution

- Coverage anywhere with Wi-Fi connectivity
- A wide range of tags available for temperature (including ultra-cold freezers for COVID-19 Vaccine and VFC compliance), humidity, voltage and dry contact sensors
- ISO 17025 accredited program to manage all NIST-traceable tags
- Easy compliance with flexible reporting; data can be stored for up to 5 years

Secure Real-time Alerts & Data Monitoring

Avoid labor intensive manual monitoring and chances for error with automated regular status updates and real-time alerts on environmental data - with the ability to prioritize alert views. Sensors continue to log data during power or network outages, ensuring continuous monitoring and recording of temperature data. NIST certification available.

Robust Proactive Management Platform

Real-time temperature, humidity, and voltage monitoring capabilities with the option to add additional applications. Immediate mobile and desktop alerts with corrective action documentation—all on one screen. On demand reports with easy-to-use interactive dashboard analytics allow staff to proactively solve problems and generate key data-driven insights to enhance workplace efficiency.

Focus on Top Priorities & Increase Cost Savings

Enhanced efficiency when you're on premises, allowing you to focus on top priorities. Peace of mind when you're not, through continuous data monitoring.

Additional benefit of cost savings from decrease in spoilage and competitively priced tag options with deployment across multiple locations.

Environmental Monitoring for the Enterprise

REAL-TIME UPDATES ACROSS MULTIPLE SITES

Avoid the risk of not monitoring your environment. Our environmental monitoring solution helps to prevent loss, increase efficiencies, and protect your organization's reputation.
