

SOLUTION OVERVIEW

# Hugs<sup>®</sup> Infant Protection

Hospital-wide infant protection and mother-baby matching

## Solution Benefits

- **Single standard of care.** Know your most precious patients are protected anywhere in the hospital, not just in L&D.
- **Easy to use.** Hugs is the easiest system for staff to work with from single sign on (SSO) and tag application through bathing and transporting infants to discharge.
- **Adapts to clinical workflows.** System is accessible at the bedside, auto-enrolls tags when band is attached, auto-cancels transfers, and includes tag management tools and compliance reports.
- **Alerts at your fingertips.** Gives nursing and security essential information at workstations or mobile devices, and with advanced technology eliminates nuisance alarms caused by traditional RF systems.
- **More layers of security.** Gives infants greater protection with continual supervision and out-of-unit alerts, enhanced cyber security, "off-line" mode for exits, and more security integrations.
- **Access to Clinical Specialists.** Our team of maternity RNs provides training, product support and peer-to-peer help.

## Challenges

Infant abductions have happened at hospitals of all sizes and types all over the world. And the risks are rising. It's not just stranger abductions and mother/infant mismatches. Hospitals must be ready for modern patient security challenges, from family abductions to pediatric patient flight and even cyberthreats. These realities make individual protection of each patient essential for every hospital.

## Solution

Our Hugs Infant Protection solution offers the most advanced and secure protection from a single department to the entire hospital. Every infant wears a Wi-Fi Hugs tag that is attached to the ankle with a special tamper-detecting band. The tag activates as soon as attached and is automatically enrolled in the system. From that moment on, the infant is safeguarded throughout your campus.

More than 1,780 hospitals worldwide rely on the Hugs solution to help them deliver the highest level of safety. It's why **Hugs is the global #1 infant security system**, protecting over 2 million infants each year.

*"Nobody really wants to be called for a Code Pink. But if there were an event, you really need a system to be able to track the baby throughout the hospital. This is the direction everybody needs to go in."*

## Advanced Security Meets Simplicity

*Significant advancements to help clinical and security staff better protect newborns against modern security risks*

## Peace of Mind from Proven Performance

*Hugs offers advanced protection for infants and pediatric patients from a single department to the entire hospital.*

### PROTECTION FOR ALL

Hugs is in use today to protect not just well newborns, but pediatric patients of all ages and NICU babies at open-crib stage.

### MORE LAYERS OF PROTECTION

No other system swaddles infants in more protection. Hugs continually watches over each infant the moment a tamper-detecting tag is attached, with all exits guarded in Labor and Delivery, Postpartum, the NICU and Pediatrics.

### SCALABLE TO ANY HOSPITAL

Hugs provides effective and scalable protection. It's the right choice whether you're supporting a 20-bed critical access hospital or a large urban medical center with thousands of births a year.

### MOTHER/INFANT MATCHING

The Kisses® component for Hugs is the only automatic and audible baby match support to traditional ID bands. It brings peace of mind for nurses and moms.

## Enterprise Coverage, Enterprise Impact

The Hugs solution is built using the most advanced enterprise software and hardware technology that can be used across one or multiple locations. You can have confidence that your infants will have the highest level of security. Start with coverage you need today and expand at any time.

The Hugs solution is just one part of STANLEY Healthcare's real-time visibility platform that includes Staff Protection and Workflow, Asset Management, Temperature Monitoring, Contact Tracing, and more.

## Clinical Education & Support Services

Comprised of experienced maternity nurses and patient safety experts, STANLEY Healthcare's Clinical Services team empower nurses and other caregivers with the training and knowledge they need to be the best defense of your infants' safety.

We also offer a range of support materials to prepare your hospital and your patients for the most comprehensive infant protection, including parent pamphlets, sample policies and planning resources.

## About STANLEY Healthcare
