UMP® FALL MANAGEMENT SOLUTIONS

Help Protect Your Residents and Reduce Fall Risk

In order to provide high-quality care, senior communities nationwide are relying on STANLEY Healthcare’s UMP Fall Management solution to monitor residents who are at risk of falling, whether in a bed, a wheelchair or the restroom. To reduce the common challenge of alarm fatigue, UMP monitors can be integrated with your existing nurse call and emergency call systems, such as our own Arial® solution. We invite you to learn more by contacting us today.

Economical and Reliable

How STANLEY Healthcare’s UMP Fall Management solutions contribute to your fall prevention program.

KEY ADVANTAGES:

- **Supports fall reduction initiatives:** UMP fall monitors continuously detect patient movement that could lead to falls, and are also ideal for at-home caregivers.
- **Deters resident tampering:** With dual button reset and volume and delay switches inside the battery compartment, the UMP Sentry™ helps deter resident tampering.
- **Pull-string model available:** Our easy-to-use, low cost pull-string monitor activates when resident movement occurs. The monitor attaches to a bed or chair and the exclusive Safety Klip is attached to the resident. An alarm sounds when the magnetic seal is broken between the monitor and the magnet, indicating resident movement.

Monitor Overview

*Sentry™ Monitor*

**Model 91621**

**KEY ADVANTAGES:**
- Dual button reset—buttons are pressed simultaneously to silence alarm
- Volume and delay switches inside battery compartment
- No on/off switch
