Asset Management Basics Course Outline

Estimated course length is 70 minutes. This course introduces learners to the Fundamentals of Asset Management, and includes the following lessons:

**Introduction to Asset Management**
This lesson introduces learners to the Fundamentals of Asset Management.

**Introduction to AeroScout® Technology**
This lesson introduces the elements and basic concepts of AeroScout technology.

**Getting Started with MobileView®**
This lesson introduces MobileView and explains how and why MobileView is used to track assets and check asset status.

**MobileView Basic Search**
This lesson introduces Favorite and Find Specific Asset searches in MobileView. It explains how to view search results in a List, Map, or Hybrid view.

**MobileView Advanced Search**
This lesson introduces Advanced Search in MobileView. It explains how to construct an Advanced Search, how to save it as a Favorite, and how to modify it.

**Report Basics**
This lesson introduces basic report generation. It explains how to use report templates, specify report parameters and generate, save, and schedule reports.

**Inventory Reports**
This lesson introduces the Inventory Report and the Inventory Summary Report in MobileView. It explains when to choose one or the other report type.

**Utilization Reports**
This lesson introduces the Utilization by Status Report and the Utilization by Location Report in MobileView. It explains when to choose one or the other report type.

**Out of Sight Asset Reports**
This lesson introduces the Out of Sight Asset Report in MobileView. It explains what an out of sight asset is and when to use the report.

**Battery Level Report**
This lesson introduces the concepts of Battery Level and Battery Capacity. It explains how to construct a Battery Level Report.

**Setting Preferences**
This lesson explains how to change setting preferences in MobileView and modify the default search result display preference.
